Professional Summary

Experienced full-stack developer building APIs and internal tools using JavaScript/TypeScript, React and Node.js. Exposure to various business problems and turning them into working solutions, usually involving React frontends, Node/Express APIs, and databases (SQL or NoSQL) that best suit the data being stored. Worked with numerous 3rd party services and internal systems to build processes allowing teams to access necessary data with minimal manual effort. Able to take ownership of features from requirements review to production deployment. Solid understanding of data structures, algorithms and OOP that goes beyond interview whiteboarding and directly into application in day-to-day coding and architecture decisions.

Education

Bhagwan Parshuram Institute of Technology, GGSIPU Delhi, India
Bachelor of Technology in Electronics & Communication Engineering | **CGPA: 9.1/10 (90%)** Aug 2024 – June 2028 (Expected)
Relevant Coursework: Data Structures, Algorithms, Database Management

Technical Skills

Languages & Frameworks: JavaScript, TypeScript, Python, React.js, Node.js, Express.js, Tailwind CSS
Real-time & Databases: WebRTC, Socket.io, MongoDB, MySQL
Cloud & DevOps: Docker, CI/CD Pipelines, Vercel, Netlify, GitHub Actions
System Design & APIs: REST APIs, JWT Authentication, OAuth
ML & AI: TensorFlow, Machine Learning Pipelines, LLMs, NumPy, Pandas, AI API Integration

Experience

Application Developer Intern June 2026 – Aug 2026
EY (Ernst & Young) Noida, India

- Worked closely with product and design teams to build out React web apps that actually matched what the business needed, not just what was in the ticket.
- Rebuilt several REST APIs that were bottlenecking data exchange with external services — got response times down by about 30%.
- Cleaned up frontend performance with code splitting, lazy loading, and better caching, which pushed our Lighthouse score up 35%.

Web Development Intern May 2026 – June 2026
Dataoids Analytics LLP New Delhi, India

- Built the front end of a few web apps using HTML, CSS, and JavaScript, wiring them up to REST APIs on the backend. Git was part of the daily routine for version control and collaborating with teammates.
- Wired up a few third-party APIs to automate stuff that used to be done manually, which saved a fair bit of back-and-forth.

Full Stack Web Development Intern Jan 2026 – April 2026
Uptoskills Private Ltd. New Delhi, India

- Built out responsive React front ends, sticking to an atomic design system and designing mobile-first since most of our users were on phones.
- Took a legacy app's frontend and rebuilt it in React — page performance improved by around 35% once it was done.

Projects

GATI – AI Railway Optimization System | *HTML, CSS, JavaScript* | [Live Site](#)

- An AI-based railway scheduling and management project that uses graph algorithms and a Digital Twin to optimize train scheduling and route planning.
- Built an interactive dashboard in JavaScript to display the Digital Twin and perform AI-assisted scheduling.

Music Galaxy Engine - Music Streaming Platform | *React.js, Node.js, MongoDB, WebSocket* | [Live](#)

- Built a music streaming app using React.js, Node.js, Express.js, MongoDB, and JWT for auth, with WebSockets handling real-time communication.
- Added synced playback over WebSockets so a group of people could listen together live, basically a listening-party feature.

EVolve - AI EV Charging Platform | *React.js, Node.js, MongoDB* | [Deployed](#)

- Built out the EV charging platform's MVP end to end, React on the front, Node/Express + MongoDB on the back. Core features: finding nearby stations, slot booking, and user auth.
- Pulled in RESTful APIs to handle some of the external data the app needed.

Achievements & Certifications

Certifications: Large Language Models – Google Skills (May 2025)
Hackathons & Awards: Industrial Ideathon 2025 Finalist – Top 40 of 650+ Teams | Ranked in top 50 nationally from 200,000+ registrations | EY Techathon 2025 Shortlisted | Smart India Hackathon 2025 - Internal Round Shortlisted, Top 45 Teams
